## About Us

AMOGH PROJECT MANAGEMENT LLC is a Project Management and Engineering Solutions Company with a high-performance network of international experts and staff from all corners of the globe. Our diverse range of proficiency, intellectual minds and passion for excellence are our main instruments to high achievements and operations at the top echelons of the industry. We boast a team of well-seasoned software development professionals with industry experience spanning: Oil & Gas, Petrochemical, Finance & Insurance, Automotive, Hospitals, Telecom, Supply Chain Management & Logistics, amongst others.

Our strength lies in keeping pace with latest technological developments, coupled with well qualified and experienced team always willing to exceed customer satisfaction. We are a people driven organization and working beyond ethnic and cultural barriers. We train our people in executing the projects with special emphasis on including and developing local talents. At APM we strongly believe in keeping pace with latest technological developments and developing operational excellence, with sole aim of delighting our customers.

We have indigenously developed and successfully implemented a Project/Construction Management tool– AMOGH™ to manage complete Civil, Piping, Mechanical and Electrical & Instrumentation activities – from design to testing. AMOGH™ is integrated to PDMS, Spooling, Cable scheduling, Construction Planning & Monitoring and Material Management. This tool enables clients, irrespective of their location, monitor the progress of their projects with real time reviewing of data for Drawings & revisions, Quality, Construction, Schedule, Materials, Invoicing etc. This tool has been successfully used in various complex projects by renowned Oil & Gas companies

## Our Services in Project Management

We provide a wide range of project management support services to the EPC contractors.

- ▶ **Integrated Project / EPC/ Management system**
- ▶ **Detailed Engineering Design**
- ▶ **Project Management Consultancy Services**
- ▶ **Material management System**
- ▶ **ERP Integration Services**

# AMOGH™ - Our Project Management Tool

We use our Construction Management Tool – AMOGH™ to manage all activities – from design to testing. The software has been indogeneously developed and successfully tested on various projects.

## What is AMOGH™?

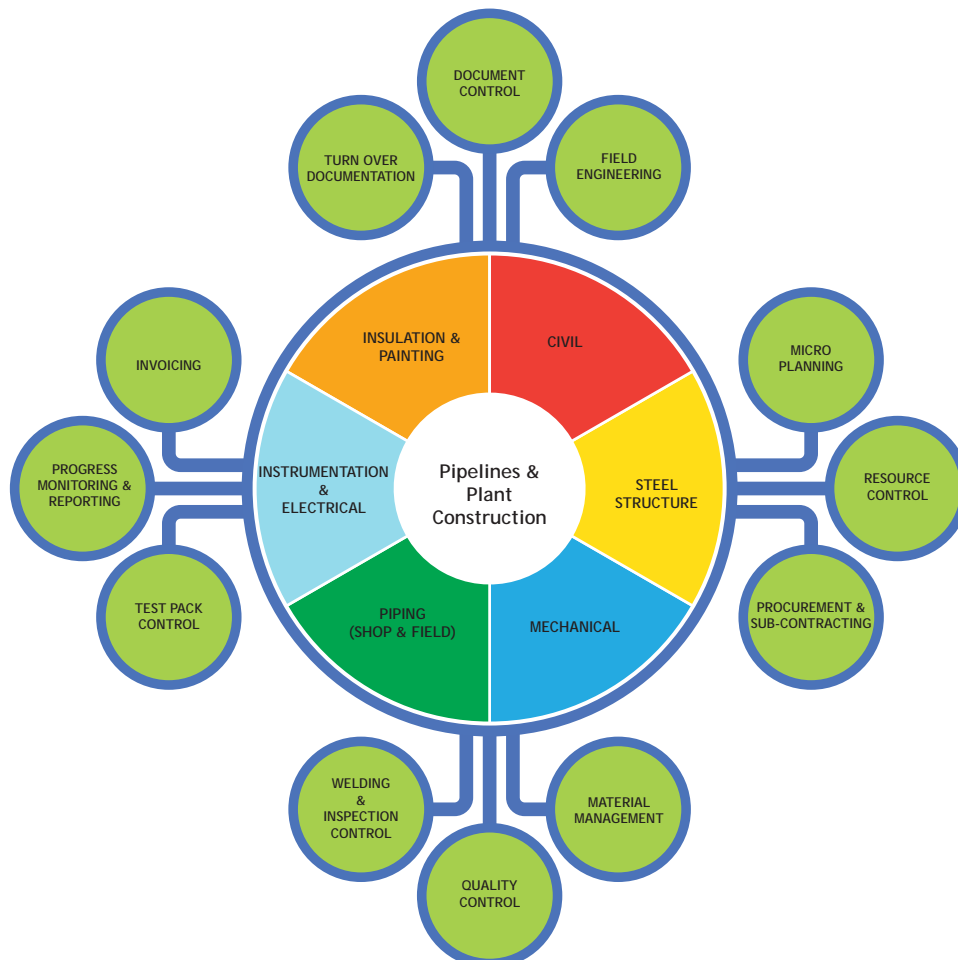

AMOGH™ brings Engineering, Procurement & Construction Data on a single user friendly platform. The tool provides integrity to the data & can be linked to tracking systems in OWNER's & CONSTRUCTOR's, Corporate Offices, Home Offices, Intermediate Fabrication Shops & Construction Sites.

System keeps track of all multi-disciplinary sub-activities & live outputs are available at all locations in the areas of Engineering drawings, Material availabilities & discipline wise status of all construction activities. System also does project control & planning functions.

Full, partial or "Read Only" access can be provided to various personnel connected with the project.

## Usage of AMOGH™?

- ▶ AMOGH™ can be used to manage multidiscipline construction project of any size and duration.
- ▶ AMOGH™ is so designed that it can be used by Project Owners, Main Contractors & Construction Contractors.
- ▶ AMOGH™ can be used by Site users as well as Home office/ Corporate office users at the desired level
- ▶ Stores project data in a form to make available the lessons learned

# AMOGH™ - Our Project Management Tool

Integrated Construction Management System for effectively managing the large process, power and other Industrial plants.

AMOGH runs on Oracle and asp.net.

Web based / local server versions are available & provides Universal access with secured credentials

Accessible by project owners, main contractors & construction contractors.

Our multi-discipline, **Integrated Project Management System** can manage any project of any complexity and control all its activities with delivery of outputs in the selected local languages.

**MATERIAL MANAGEMENT**  
piping, structures, equipment, packages, allocation, inventory, final reconciliation

**DOCUMENT MANAGEMENT**  
drawings, technical registers, change orders, RFI's, day work sheets etc.

**PROGRESS MANAGEMENT**  
with customised option of reporting levels (top management to field level)

**CONTRACTS MANAGEMENT**  
manage changes, quantity surveying, variation orders, extra works, claims and counter claims documentation

**Micro Construction Planning**  
for all segments (Process, Civil/ Structural, Mechanical, Piping/Pipeline, Electrical, Instrumentation & Controls),

**CONSTRUCTION MANAGEMENT**  
management of project resources, productivity, man-hours, cost etc

**Quality Management & Control**  
fit-up, welding, NDE, construction quality & final documentation

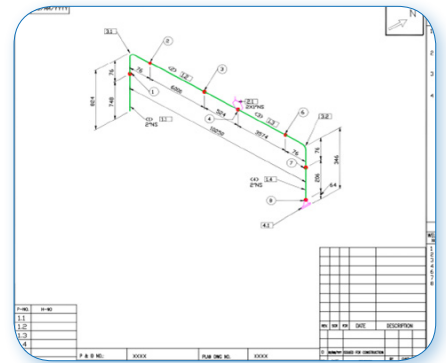

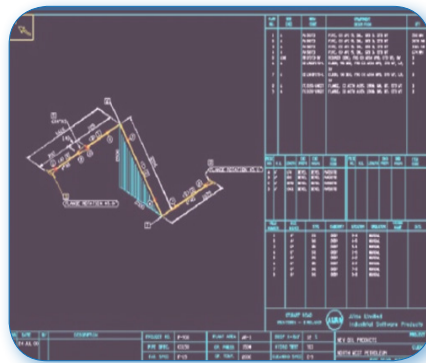

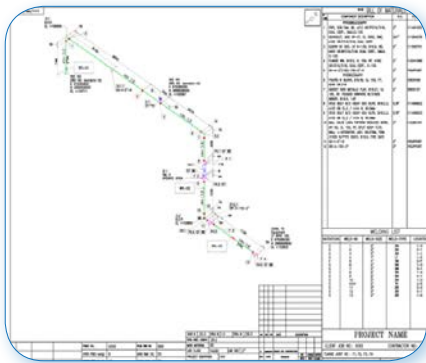

**Facilities Turnover**  
through punch list management & final documentation

# Services Offered

## Engineering & Design Services

- ▶ Detail Engineering, designing and drafting.
  - Detail & field Engineerin
  - 3D Modelling by PDS/PDMS
  - Extraction and annotation of GA drawings
  - Isometrics Preparation
  - Isometric Spooling using Spoolgen
  - Pipe Support designing & detailing
  - Cutting Plans preparation
  - Electrical & Instrumentation detail engineering
  - As Built drawings preparation
- ▶ Tie-in Dossier preparation & management
- ▶ MTO preparation for all disciplines
- ▶ Structure Steel designing & detailing
- ▶ Test Pack preparation and control
- ▶ Interfacing management & TQ management.

## Services Offered

### Material Management System

- ▶ Material Handling
  - ▶ Inventory Control
  - ▶ Warehousing
  - ▶ Quarantine, Preservation & Storage
  - ▶ Material Inspection
  - ▶ Material Reconciliation
- 
- ❖ We use web based material management software to control all procurement & material management activities.
  - ❖ Save considerable time and money with APM material management process that is focused on quality.
  - ❖ Integration of construction work front and material available / expected to arrive help us to manage construction in a better way. Our system has the capability to carry out material simulation with respect to drawings & Construction priorities.
  - ❖ The package allows multiple-user access and is used to receive, track and control all project deliverables, equipment and materials.
  - ❖ Procurement purchase order detail is incorporated into the material management tool.
  - ❖ Provide various timely checks and alerts to users.
  - ❖ Our team comprises of experts in quantity analysis, budget projections, finance management and shipping, and we add value at all phases of procurement.

**Through trust and long-standing relationships with key global manufacturers and suppliers, we provide the best Procurement management services**

## Services Offered

### ERP Integration Services

**Our team of dedicated professionals are able to realize the modern business objectives through the automation and mobilization of the ERP systems.**

- Integration of multiple functions within the enterprise
- Greater efficiency of business processes
- Automation of manual processes
- Greater visibility for business stakeholders
- Ability to meet compliance requirements
- Process cost savings
- Better connections with customers and suppliers
- End-to-end monitoring of IT assets, applications, and devices
- All issues are spotted timely and managed efficiently to minimize the risk
- Increased stability and reliability
- Reduced maintenance overheads
- 24x7 monitoring

**From financial and human resources management to procurement and order processing, we can deliver enterprise resource planning (ERP) systems boosting clients' operational efficiency.**
